Saneem Perinkadakkat

Door 003, Building #36 – Sri Sai Ram Kalyan Kelsey, 1st Cross, 27th Main, VGS Layout, Ejipura, Bengaluru – 560047

+91-9809639109 – xaneem@gmail.com - github.com/xaneem

Objective

To work on products and ideas that enhance people's lives.

Experience

Software Engineer

Autoninja, Bengaluru

2016 – present

Working with a team on building a user-friendly admin console to manage a SaaS application. Involved in front-end and back-end development. Other responsibilities include training, improving development workflow and coding practices etc.

Full-Stack Web Developer & Founder

ClusterDev

2015 – 2016

Build and maintain web applications and APIs. Involves back-end, front-end and DevOps work. Other responsibilities include developing technical specifications, discussions with clients etc. This was my own development agency and employed other freelancers occasionally.

Developer & Co-founder

Elegant Surveys

2014 – 2015

Worked with a team of four on development of a mobile application, API and accompanying admin panel. My contribution included planning and prioritizing features of the product and developing the API and the admin panel.

Web Developer & Consultant

Freelance

2011 – 2014

Worked with several clients around the globe with custom solutions to business problems. Included small projects like API integration, code refactoring and bug fixes to large ones like building complex web applications from scratch involving front-end, back-end, third-party integration and deployment.

Education	**B-Tech Mechanical Engineering**
	National Institute of Technology, Calicut, Kerala
	Graduated in 2015, CGPA 7.38

Apart from core mechanical engineering subjects and computer programming, studied Artificial Neural Networks and Graph Theory as electives.

AISSCE (XII Standard)

Al-Farook Residential School (CBSE), Calicut, Kerala

Completed in 2010, Aggregate 95.2%

Physics, Chemistry, Mathematics and Computer Science.

About me

I've always been in love with technology ever since I got a computer as a kid. My first encounter with programming was when I created a browser based application to keep track of my CD collection – I was 14 and the only reference available were the documentation that came with IIS on Windows XP.

I've done lots of random stuff on the internet, from writing a technology blog, building an ad-supported image sharing website and several freelance projects.

My other interests include reading, hobby electronics and traveling. I chose to learn mechanical engineering because I was intrigued by machines, robots and automobiles; learning it has helped me gain a wider perspective.

Technical Skills

I've worked with a variety of languages, technologies and tools.

Back-end: PHP – Laravel, CodeIgniter, Slim Framework, JavaScript – node.js, Express, PhantomJS, Ruby – Ruby on Rails

Front-end: HTML, CSS, Bootstrap, D3.js, JavaScript, jQuery, AngularJS, Browser Extensions

Other: Git, Grunt, Gulp, Yeoman, Swagger, Heroku, Digital Ocean, AWS

I'm a quick learner and can understand new concepts, codebases and programming languages very fast. Although not formally educated in it, I have a good grasp of algorithms and data structures. I've also worked with lots of third-party API like MailChimp, SendGrid, Facebook, Vimeo etc.

I love contributing to open-source. Some of my code are widely used - the most popular ones would be a PHP wrapper for the Flipkart API, and a web app for "Online Treasure Hunts". More details are available on my profile @xaneem on GitHub.

Personal Info

I'm a 23 year old guy currently living in Bangalore, India. I speak English and Malayalam very well, and average Hindi.
